

A 5x5 grid with columns indexed 0 to 4 from left to right and rows indexed 0 to 4 from bottom to top. A dashed line connects a white circle at (0, 4) to a black circle at (1, 1). There are grey circles at (2, 3) and (3, 1).

A 5x5 grid with a vertical line between the second and third columns. A path of dots starts at a white dot at the top of the vertical line, goes down to a grey dot at the second row, then to a black dot at the bottom of the vertical line, and finally to a grey dot at the bottom of the third column.
